Quiz 10: 8.5 Probability

June 18, 2015

1. Suppose $f(t)$, where t is measured in hours, is the probability density function for the lifetime of a lightbulb with probability space $[0, \infty)$. What is the probability that the lightbulb will fail within the first 500 hours?
 - A. $\int_0^\infty t f(t) \, dt$
 - B. $\int_0^{500} f(t) \, dt$
 - C. $\int_{500}^\infty f(t) \, dt$
 - D. $f(500)$
