

## Quiz 1: Chapters 2.1-2.3, 2.5

1. Use the following graph of  $f(x)$  to answer the questions below it. If an answer does not exist and is not infinite, answer “DNE”. For “True or False” questions, circle either “True” or “False”.

- (a)  $f(0) =$
- (b)  $\lim_{x \rightarrow 0^-} f(x) =$
- (c)  $\lim_{x \rightarrow 0^+} f(x) =$
- (d)  $\lim_{x \rightarrow 0} f(x) =$
- (e)  $\lim_{x \rightarrow 1} f(x) =$
- (f)  $\lim_{x \rightarrow 4} f(x) =$
- (g)  $\lim_{x \rightarrow 5} f(x) =$
- (h)  $\lim_{x \rightarrow 8} f(x) =$
- (i) True or False:  $f$  is continuous at 1.
- (j) True or False:  $f$  is continuous from the left at 2.
- (k) True or False:  $f$  is continuous from the right at 2.
- (l) True or False:  $f$  is continuous at 3.
- (m) True or False:  $f$  is continuous on  $[0, 1]$ .
- (n) True or False:  $f$  is continuous on  $(3, 4)$ .
- (o) True or False:  $f$  is continuous at  $(1, 2]$ .
2. The slope of the line tangent to  $f(x) = x^2$  at the point  $(1, 1)$  is  $m = \lim_{h \rightarrow 0} \frac{(1+h)^2 - 1}{h}$ .

(a) Evaluate  $\lim_{h \rightarrow 0} \frac{(1+h)^2 - 1}{h}$ .

- (b) Write the equation of the tangent line. (Hint: “point-slope” form of the equation for a line is  $y - y_0 = m(x - x_0)$ ).

3. Evaluate  $\lim_{x \rightarrow 1} \cos(x^3 + x^2 - x - 1)$ .

4. Use the squeeze theorem to show that  $\lim_{x \rightarrow 0} x^2 \sin^2 \frac{\pi}{x} = 0$ . (Hint:  $0 \leq x^2 \sin^2 \frac{\pi}{x} \leq x^2$ )
